COMING!

COMING!

Thursday

November 13th, 1958

8:00 P. M.

GEORGE W. VAN TASSLE!

DREXEL HALL
Linwood & Main
Kansas City, Mo.

Donation: \$1.00 card bearing members; \$1.50 others; 50¢ Juniors

BE THERE AND BRING ALL YOUR FRIENDS!

VAN TASSLE HAS A MESSAGE FOR EVERYONE!

It is with great pleasure that your Kansas City Club announces George W. VanTassle, of Giant Rock, California, as our next open forum speaker. He appears for the purpose of bringing his message to EVERYONE. Mr. VanTassle has spent the past ten years of his life in searching out the truths of the Saucer picture. He is the author of two books, "I Rode A Flying Saucer," and "Into This World and Out Again." He also has a large group throughout the world that are working with him in many ways to spread the message he has to offer. He is the publisher of PROCEEDINGS, a monthly paper that carries much valuable information for all persons interested in the Saucer subject. Mr. VanTassle is an ardent researcher and relates his many experiences with both space people and their craft. His information is quite unlimited. He is a capable speaker and has sponsored the Giant Rock Space Convention during the past few years. This man is well worth hearing and is one of the very top in the field. So Come! Tell your friends! Your club is expecting a turnout of record proportions! You are the one who is directly responsible for it! Talk it up AND BE SURE TO COME YOURSELF! Circle that date on your calendar. Make this the most important date of the year up to now. See you there!

INCIDENTALLY: The difference in rates between non-members and others is not to discourage outsiders from coming --- BUT we now have neared the 600 mark for names on our mailing list. This costs the club lots of money. In that our library is costing us quite a sum, and in that this paper costs considerable, we are doing EVERYTHING WE CAN TO INFLUENCE persons to join with us in our association. Halls cost money, speakers have heavy expenses. Postage runs high. We've got expenses. Your share doesn't amount to much. So JOIN WITH US NOW!

OTIS T. CARR: The lecture given by Mr. Otis T. Carr on Sunday, October 12, 1958, was of great interest to all who attended. Mr. Carr had on hand a model of his "saucer" which, he states, operates upon "free energy". He explained that his destination is the moon and the date for such a flight is December, 1959. In an interview with Mr. Carr, it was brought to light that he is now very busy with his project in Baltimore. In fact, he just arrived by auto from Baltimore a few hours before his lecture. His craft has some very fascinating principles, the main one being the wheel within the wheel and the principle that when the counter rotation of these two wheels is in direct ratio with the rotation of the Earth upon its axis, his ship becomes free of gravity and therefore airborne. (Airborne is not the right word for his ship which reacts in the magnetic field which we believe surrounds the Earth and permeates all space.) The interesting thing about this principle is that the same principle is now stated in published and unpublished works on saucers. And Mr. Carr was not conscious of this until AFTER his principles were explained.

INCIDENTALLY: Having heard of Major Wayne S. Aho's marriage to Dorothy Shaeffer, Mr. Carr will either have to build his ship to accommodate another passenger or look for a new one. GOOD LUCK, MAJOR AND MRS. AHO. May good luck be your companion wherever you travel!

SIGHTINGS: Although sightings have been reported, perhaps the most interesting case of this month is given in Newsweek dated October 20, 1958, IN THE FORM OF A DENIAL BY U. S. AIR FORCE OFFICIALS! "Checking It Out," page 34. This item tells of the following incident. Missilemen at a Nike station at Derwood, saw the following: It arrived early in the morning, skittered over the treetops, it landed, casting a weird glow. A three-man team was sent out to check it. What did they find? Nothing on the ground. Their conclusions: A falling star or meteorite had been sighted and a 200 watt bulb in a farmer's barnyard caused the glow. Now let's just look at this for a moment. Who saw it? Nike missilemen who, we understand, are highly trained technicians and in all probability observers. If they don't know a light skittering across the treetops from a falling meteorite, then you better not throw your hat up at the next football game you go to -- or you might end up with a Nike missile through it! So we add these observers to the long list of Air Force pilots, the radar men, the Ground Observers, Patrolmen, Policemen, etc., who don't know what they are seeing. What was the weird glow? A two hundred watt lamp on a farmer's barn. Having a few hay seeds in my own hair and quite a few callouses from shucking corn, I always found there was no friendlier light than a farmer's barnyard light and during all the years spent in the farming country, never once did one cast a weird glow. Maybe that's because hardly anyone goes through a night without seeing quite a number of them and can recognize them immediately for what they are. The ending of the article didn't sound as if the writer or editor was buying it very thoroughly. Thanks to Newsweek for this excellent report.

FRONT PAGE NEWS: Almost everywhere one looks nowadays one sees the Air Force reports that all but two per cent of the reportings have been explained. It is not the intent or policy of this paper or this organization to try in any way to discredit our U.S. Air Force, for they are a fine organization and everyone is proud to see any one of our young men, straight and tall in his blue uniform sporting wings. It brings to all a sense of confidence and pride in the services and the youth of this great country. Yet, the Air Force does adopt a policy every once in a while that is quite hard to fathom. Perhaps they have a very good reason for their attitude and we give them full credit for it and do not want to question it. However, we also have a responsibility upon our shoulders to try and get as much pertinent information as we can to those who wish to judge for themselves. Questioning and thinking is the inherent right that our forefathers fought and died for, that we might have it in full. Let's use that right and practice it! Make your own decisions, and don't let ANYONE ELSE DO IT FOR YOU! Two weeks ago, one local paper published on its front page such a report. Your editor wrote the editor of that paper and here is the gist of that letter, which, incidentally wasn't published:

"In regard to the report that the U.S. Air Force has said that all but two per cent of all flying object reports have been accounted for: During World War II this writer was on Wake Island and was captured there and remained there as a prisoner of the Japanese for ten months and then was sent on to Japan. During that period, we prisoners had hidden a radio in one of the brushy areas of this island and in that way had access to all the island during the entire day, used this radio to tune in news broadcasts from Honolulu. We were amazed at what was broadcast about attacks on Wake Island when attacked by Allied Planes and Forces was almost opposite to what had actually happened during those attacks, and personally observed by ourselves." Nuf sed.

BOARD MEETING: It is at the request of your board that ALL members of the U.F.O. Study Club be invited to attend these meetings. We are in need of much help. The job of Treasurer is open, plus the job of program chairman. We need help to keep things going the way you want them to go. Executive Board meetings are held on the third Sunday of every month at the Kansas City Museum in north section of the city. Plan to come! Call either Mrs. Bennett at WA 1-8170 or Paul Wheeler at CL 2-3351 for exact time and date. Come. We need your help and advice. We are planning to get together where we can talk more closely with each other and present for your inspection literature, a list of books in file at the library, and a list of tapes available either

for copying or free playing before your group. Let's hear from you regarding these matters. Box 412, Kansas City 41, Mo., is our address. Use our box. Let's hear from you.

It is with great regret that the Board accepted the resignation of Mrs. Francie Park from all duties connected with our club. Her reasons are worthy and although all members hated to see her leave, her resignation was reluctantly accepted. Her help has been most invaluable, to say the least, and all members hold the very highest regard for Mrs. Park and her abilities. We hope it will not be too long before she can return and take up her responsibilities again. Her message to all is:

"Personal Greetings: Hello to all you good UFO'ers and friends. Fellowship in this field is the most wonderful opportunity to meet the most WONDERFUL people in the world! Alas, the demand of personal affairs now precludes my continuing in office or as assoc. editor, so I must formally resign all official duties, but will retain Club membership and active interest. There are many of you who have much to give this effort, but have been somewhat shy about coming forward, since we are all very widespread and have not had proper social contact. Let this be an appeal to you to take the initiative to take part. The too few working members of the Club need you and welcome you! And you know your rewards are always greater than the efforts expended. Will be seeing you regularly at Club meetings and will always be glad to hear from you. (Am in the phone book.) Much success and warmest wishes to the Executive Board members, Club members and friends. Francie Park, past Vice Pres./Program Chm.10-26-58."

Good luck, Francie! We know you're near -- just in case.

STORY OF THE WEEK: A friend called the other day and told a little story that might be of interest. The person of whom she spoke had just gotten a flash from inside sources that the "saucers were flying". The time was around eleven o'clock at night. Mr. Eager Beaver (the boy that had received the message) immediately dug out the old army cot, got out a few heavy blankets, brewed a canteen of coffee and made a bed under the stars. He wanted to be in on the show. No sooner had he hit the bed than-- Blooey! -- You guessed it. He went to sleep. Don't YOU sleep through the big show! Keep awake! Keep your lamps trimmed and full of oil!

HERE'S ORIGINALITY: The following poem was just received by President Paul M. Wheeler from one of our ardent members, Mrs. Julia T. Brogan. We appreciate her inspiration and are glad to share it with our readers:

U F O ' S

Oh shining discs in heaven's deepening blue,
As silently you scan our infant world,
What hopes, what dreams, transmit to earth through you--
Protected, shielded--as through space you whirled?

From what far planet comes your lovely sign?
What destiny--infinity--you merge?
The galaxies roll on, complete, divine.
Earthbound, wild wars and tumult round us surge.

Are you our guide to deeper, richer life?
Our brothers, who this earth have often trod?
Teach us your ways--tranquility for strife--
Help us to know we serve a mutual God.

--Mrs. Julia T. Brogan
3003 Independence Avenue
Kansas City 24, Mo.

PARTING THOUGHT:

"He must increase, but I must decrease. He that cometh from above is above all; he that is of the earth is earthly, and speaketh of the earth: He that cometh from heaven is above all." -- John 3:30-31.

Let's all just kinda keep our thoughts and eyes in that direction, what say?

AND WHO'S WHO FOR DECEMBER? -- Well that IS a SURPRISE!

COMING;

COMING!

COMING!

COMING!

COMING!

COMING!

WHEN?

WHO?

VAN TASSLE, THAT'S WHO!

WHERE?
